

E.B. CAMPBELL HYDROELECTRIC STATION

Commissioned in 1963, the E.B. Campbell Hydro Station is the province's largest hydroelectric station.

- 8 operating units
- Total plant output capability of 289 megawatts

The station is named in honour of E.B. (Bruce) Campbell, a former SaskPower president. He was the assistant chief engineer when SaskPower built the station.

Recent Refurbishment of Units 1-6:

- Costs approximately \$300 million,
- Allows 50 more years of renewable power generation
- As of April 2022, \$6 million went to Indigenous and local employment opportunities.

Work on the hydroelectric station will continue until 2025.

DIRECTIONS TO E.B CAMPBELL

1. Head east on PTH/ SK -55 E, and drive for approximately 28 kilometers.
2. Turn left onto SK-123 N, driving for 41.6 kilometers.
3. Turn left, drive 750 meters, and the destination will be on the right.

NIPAWIN HYDROELECTRIC STATION

Commissioned in 1986, the Nipawin Hydroelectric Station is the province's newest hydroelectric station.

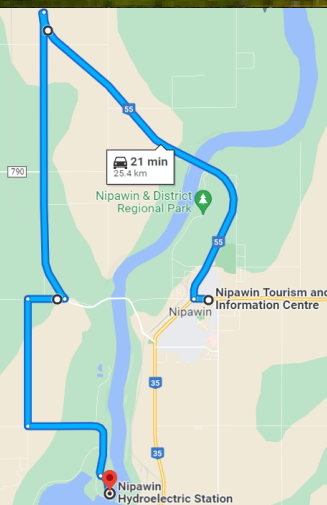

- 3 operating units
- Each producing 85 megawatts of electricity
- 1.1 billion kilowatt-hours of power generated annually

That is enough power to supply 175,000 average households a year!

The dam is named in honour of James Finaly and English merchant Francois Leblanc. Together in 1768, they constructed a trading post on the lower terrace of Bushfield Flats immediately upstream of the power station.

This construction wonder and the spectacular river gorge are best viewed at the Francois Finally Dam Vista Viewpoint. For a further adventure, one can wander down the hillside to reach the water. This is a beautiful spot for inshore fishing and a short walk along the river.

For inquiries, please contact SaskPower at 306-862-3148.

DIRECTIONS TO NIPAWIN HYDROELECTRIC STATION

1. Turn onto SK-35N/SK-55W
2. Turn left onto the Old Highway 35
3. Take a sharp right, followed by 3 left turns
4. Take one final right and your location will be right ahead
5. Road signs are available and will help aid direction!
