Town of Nipawin – Council Meeting Follow-Up Highlights
September 28, 2026

Delegations

Council heard from two community delegations at its most recent meeting.

Nipawin Nutrition for Kids

A representative from Nipawin Nutrition for Kids spoke to Council about the continued need for school breakfast programming in Nipawin, particularly at Wagner and Central Park schools.

The program helps ensure local students have access to breakfast before starting their school day.

Council officially declared October as Feed a Kid Month in Nipawin, recognizing the importance of the program and the support it provides to children and families in the community.

Citizens on Patrol

Nipawin Citizens on Patrol provided Council with an update on its activities, financial reporting related to Town grant funding, and the work of the non-profit organization.

The organization has an active membership but identified volunteer recruitment as an ongoing challenge. Members patrolled approximately 5,000 kilometres over the past year, with a full patrol of Nipawin taking approximately 89 minutes to complete.

Citizens on Patrol has also been involved with the Lost Child Initiative at the exhibition, work related to the back alley bylaw, development of a keyholder program, the Cram the Canoe food bank campaign, and volunteer recruitment at the Nipawin Lions Trade Show.

The organization continues to welcome new members and will provide training to those interested in taking part in the program. Council appointed Joyce Watts and Les Blair as Council liaisons to the Citizens on Patrol program.

SaskWater Lagoon Rate

Council received an update on the scheduled increase to the rate SaskWater pays for use and management of the Town's lagoon system. The increase is part of the agreement signed in 2024 and represents the third scheduled adjustment in three years. The revised rate helps offset lagoon operating and system costs and is not expected to have a significant impact on the Town's overall budget.

Enterprise Centre Agreement

Council approved a five-year agreement with the Saskatchewan Health Authority for the rental of the Enterprise Centre. The agreement provides long-term use of the facility while helping maximize the use of a Town-owned asset and supporting health-related services within the community.

Recycling Program Renewed

The Town renewed its agreement with the Saskatchewan Association for Resource Recovery Corp. for operation of the Eco Centre at the landfill. The program provides residents with a location to recycle products, including used oil and antifreeze, helping ensure these materials are properly collected and managed.

Secondary Suite Approved

Council approved a discretionary use application for a secondary suite. The development will include a separate entrance along with additional parking accessed from the alley.
